

AUTOMATED
HANDWOVEN
NATURAL SHADES

with AUTOMATION PROJECT MANAGEMENT
a concierge service for the interior design community

A NATURAL EVOLUTION

EXPERIENCE SUSTAINABLE LUXURY

The best-designed interiors offer more than a comfortable or beautiful place to live – they enhance the experience of living.

They are designed with anticipation to simplify life with effortless and intelligent functionality. It is for these refined interiors that Hartmann&Forbes automates handwoven natural windowcoverings.

THE NEW STANDARD

The H&F offering has evolved naturally with the advancement of available motor technology and is designed to accommodate all levels of control and project complexity. Our Automation Specialists are available to educate and support your project to ensure successful specification and installation.

NEWTON RECHARGE

The starting point in smart home automation for today's digital lifestyle. Motorize a single shade or a complete room with these pre-programmed, rechargeable battery motors. This system can be controlled with a gentle tug of the tassel or a touch of the remote.

SOMFY WIREFREE

This ultra-quiet motor provides you with a wirefree solution for your retrofit projects. Control a single shade or the entire house with these pre-programmed, rechargeable battery motors. Can be a stand alone solution or fully integrated into a home automation system.

H & F AUTOMATION

Wired Solutions

SOMFY LOW/LINE VOLTAGE

Offering unsurpassed quality and performance for new construction and retrofit projects where wiring is an option.

These ultra-quiet and powerful motors are the perfect solution for custom luxury homes. Can be a stand alone solution or fully integrated into a home automation system.

3rd Party Integration

COMPLEX

WHOLE HOME INTEGRATION

The ultimate experience can be created using a total home control solution, where shades are integrated into an automated home routine. The H&F Automation

Project Management program is designed to ensure proper specification of your project.

Hartmann&Forbes' standard automation and control solutions are from
Somfy, the worldwide leader in motor technology.

Automation solutions are available using single and multi-channel remotes, timers and other control options, and can be integrated into most common automation platforms including Crestron, Lutron, Control4, Elan and Savant. They can also be used with voice control systems such as Amazon Alexa and Google Home.

AUTOMATION PROJECT MANAGEMENT

A COMPLIMENTARY SERVICE

To simplify the process of ordering and automating Hartmann&Forbes window coverings, our Automation Specialists can help you design, specify and manage your projects. They can collaborate with your team of architects, builders, installers and integrators to help you ensure your project is properly specified.
